

Project X

ProjectX is a BEP-20 token, created to push the boundaries of the crypto sphere to a different level by creating a higher standard.

The token includes within it a set of utilities and features

Today we will introduce one of our unique features:

X-Club

Project X

What the X-Club is about?

An exclusive club that will be benefiting its members in a few ways.

X-Club wallet:

A wallet that will be holding 200,000,000 Tokens – which are 20% of the total supply.

That wallet will be gaining Eth rewards (7% of our tokenomics taxes) as every wallet does.

The Eth rewards will be used to buy ProX tokens back (buyback).

The tokens from this buyback will be divided among the X-Club members!

Project X

How can I be part of the X-Club?

Basically, the X-Club members will be divided into 3 different levels.

Each level requires a holding of a minimum tokens:

Level #1 – Silver – Minimum of 1,000,000 Tokens

Level #2 – Gold – Minimum of 5,000,000 Tokens

Level #3 – Platinum – Minimum of 9,000,000 Tokens

Project X

Example:

Let's say that ProX volume reached to 5,000,000\$ volume in a certain month.

7% out of that, which is 350,000\$ will be divided among the ProX holders based on their percentage they hold (Minimum of 300,000 tokens required to earn rewards).

20% out of that 7% - which are 70,000\$ - will be used to buy ProX tokens back!!!

(We will do stealth buybacks during the month)

Those tokens eventually will be rewarded to the X-Club members!

And the buybacks will also keep the charts healthy.

Project X

How is X-Club different from regular staking?

	X-Club	Regular staking (at other cryptos)
Locking your tokens in staking	Not needed, you keep your tokens in your wallet.	Needed
Keep earning Rewards (ETH)	Yes	No
Early withdrawing fee	No, because you hold your tokens	Yes

Project X
